3 TIPS FOR KEEPING IT CLEAN!

① Keep Trays and Racks Looking New!
Use a good drying and rinse agent that is a true surfactant to repel moisture and condensation – leaving the metal surfaces clean and bright! Ask for RPI's 2 oz. Sci-Dry™ (RPI Part #SCA054) and the handy 16 oz. refill bottle (RPI Part #SCA046).

② Keep Chambers Clean!
To keep the chamber up-and-running, use a mild cleaning compound, formulated for descaling and removing water deposits, oxides, and other sediments that collect in the chamber. Ask for RPI's Tutt-Clean™ (RPI Part #TUC094), the perfect solution.

③ Use the Right Cleaning Tools!
RPI's cleaning kit includes all of the tools needed to clean the entire sterilizer – inside and out. Specially designed to keep organized multiple sized brushes, sponges, and pads, it's a must-have for keeping sterilizers functioning at their best. Ask for RPI's Cleaning Kit (RPI Part #RPK791).
